

OUR SERVICES

Specialized Consulting

In addition to our core services, OneEQ also offers a range of specialized services focused on solving our clients' most intractable problems, especially when it comes to healthcare technology, medical equipment and new systems.

Transition and Activation

- Assist in establishing transition objectives, teams, responsibilities and communication channels.
- Engage staff in preparations for achieving a smooth transition, including dress rehearsals and operational plans for new features and workflows
- Implement plan for patient and department relocations, orientation and training
- Comprehensive move sequencing to include FF&E, IT and materials as well as security, maintenance and distribution

Design and Best Practices

- Offer extensive knowledge of hybrid ORs, imaging planning, OR integration, Perioperative environmental planning, Clinical Lab design and regulatory compliance.
- Optimize processes and operational efficiencies through modeling and simulation.
- Provide professional services focused on voice, data, wireless, audio-visual, security, medical communications and clinical specialties.
